Bachelor Of Engineering (CSE)	Manipur Institute Of Technology, Takyelpat	73.34%

PROJECT

• [Ningthi Delivery Partner App](#) -

These apps help the way we order food, groceries, and other essentials. With just a few taps on our smartphones, we can have our favorite meals or products delivered to our doorstep in no time. The main key of this app is that the customers can order from the wide range that provide delivery services. It was developed using React Native.

• [Awpara App](#) -

Awpara is a mobile application developed using React Native, a framework for building cross-platform mobile applications. The primary focus of Awpara is to create immersive and interactive augmented reality (AR) experiences for users. Awpara can be used in educational settings to create interactive learning experiences. For example, students studying anatomy can explore virtual models of the human body overlaid onto their surroundings, making learning more engaging and interactive.

- [EdPoly](#) -

We are passionate about the power of 3D technology to revolutionize education. Our journey began with a vision to enhance learning experiences through immersive digital 3D props and models.
